

## **REMARKS**

Applicant appreciates the Examiner's allowance of Claims 1-27 which is all of the pending claims in this application. In the Office Action, the Examiner, however, raises a few informalities in the application. Applicant will address each of these informalities below.

### **Title**

In the Office Action, the Examiner objected to the title and suggested a new title "Front Light Having A Plurality of Prism-Shaped Lenses." Applicant has amended the title as suggested by the Examiner, and accordingly, it is respectfully requested that this objection be withdrawn.

### **Abstract**

The Examiner also objects to the Abstract for informalities. Accordingly, Applicant is amending the Abstract herein. It is respectfully submitted that as amended, the Abstract is no longer objectionable, and it is respectfully requested that this objection be withdrawn.

### **Drawings**

The Examiner also has the following objections to the drawings:

The Examiner objects that reference character "5" has been used to designate both "reflective LCD" (page 2, line 12) and "liquid crystal panel" (page 3, line 5). In response, Applicant has amended page 2, line 12 as follows "reflective LCD liquid crystal panel". Hence, this objection has been overcome.

The Examiner also states that reference character "1b" is used to designate "side surface" (page 2, line 20) and "lower surface" (page 5, line 12). In response, Applicant has amended

page 5, ln. 12 to recite “the lower surface [[1b]] 1d.” This reference character and designation is now consistent with the rest of the specification, and it is respectfully requested that this objection be withdrawn.

The Examiner also states that reference character “700” is used to designate “sensor” (page 45, line 15) and “adhesive type sensor” (page 45, line 22). In response, Applicant has amended page 45, ln. 15, page 45, lns. 17-18 and page 45, ln. 22 to recite “adhesive type sensor 700.” Accordingly, it is respectfully requested that this objection be withdrawn.

The Examiner also states that reference character “106” has been used to designate different parts in different embodiments and refers to Figures 1A, 3A, 3B and 3C. In response, Applicant is amending “106” to “1061” in Fig. 3A, amending “106” to “1062” in Fig. 3B, and amending “106” to “1063” in Fig. 3C. In addition, Applicant is amending the specification to recite “1061” after “prism-shaped lenses “ on page 16, line 5, “1062” after “prism-shaped lenses “ on page 16, line 7, and “1063” after “prism-shaped lenses “ on page 16, line 10. Accordingly, it is respectfully requested that this objection be withdrawn.

### Specification

The Examiner also has a few objections to the specification. As Applicant has amended the specification as suggested by the Examiner, it is respectfully requested that these objections be withdrawn.

### Conclusion

Accordingly, the present application is in a condition for allowance and should be allowed.

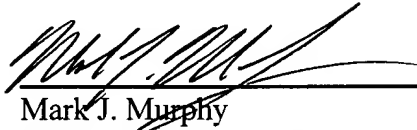

If any fee is due for this Amendment, please charge our deposit account no. 50/1039.

Favorable reconsideration is earnestly solicited.

Respectfully submitted,

Date:

*July 14, 2005*

### **IN THE DRAWINGS**

The attached sheets of drawings include changes to Figs. 3A-3C so that each does not use the reference character "106" to designate different parts in the different figures. Applicant is also submitting formal drawings.
